Art Unit: 1774

The finality of the last Office action is withdrawn in view of the following new rejections.

Claims 4, 6-9, 11-13, 15 and 16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-23 of U.S. Patent No. 7,153,539. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods claimed in the aforementioned patent produce the article claimed in the present application.

Claims 4, 6-9, 11-13, 15 and 16 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3-6 of copending Application No. 10/602,134. Although the conflicting claims are not identical, they are not patentably distinct from each other because the two marking materials in the aforementioned application are located in different areas and luminesce at different wavelengths.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
